

# CORONAVIRUS

Protect your employees  
and your health

**INTEGRITY**<sup>TM</sup>  
FACILITY SOLUTIONS

## ✓ Protection and Prevention Tips

-  **1** Wash your hands often with soap and water for at least 30 seconds. If not available, use an alcohol-based hand sanitizer
-  **2** Avoid touching your eyes, nose and mouth with unwashed hands
-  **3** Avoid close contact with people who are sick.
-  **4** Stay home when you are sick.
-  **5** Cover your cough with a tissue and discard into the trash
-  **6** Disinfect and clean thoroughly all touched surfaces and objects

## What is the source of the virus?

Coronaviruses are a large family of viruses. Some cause illness in people, and others, such as canine and feline coronaviruses, only infect animals. Rarely, animal coronaviruses that infect animals have emerged to infect people and can spread between people. This is suspected to have occurred for the virus that causes COVID-19. Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS) are two other examples of coronaviruses that originated from animals and then spread to people.

The following symptoms may appear 2-14 days after exposure.

- Fever
- Cough
- Shortness of breath

## How does it spread?

This virus was first detected in Wuhan City, Hubei Province, China. The first infections were linked to a live animal market, but the virus is now spreading from person-to-person. It's important to note that person-to-person spread can happen on a continuum. Some viruses are highly contagious (like measles), while other viruses are less so. The virus that causes COVID-19 seems to be spreading easily and sustainably in the community ("community spread") in some affected geographic areas. Community spread means people have been infected with the virus in an area, including some who are not sure how or where they became infected.

There is currently no vaccine for COVID-19, however studies have shown if you disinfect the environment with proper disinfectants, you can significantly reduce the risk!

Ask about getting your facility deep cleaned and disinfected

We also offer disinfectant fogging of your entire facility.
